High Efficiency Synchronous Buck Converter, 12V Input to 1.1V at 25A using the TPS51117

(ACTIVE) PMP2993

View the Important Notice for TI Designs covering authorized use, intellectual property matters and disclaimers.

Description

PMP2993 uses the TPS51117 in a synchronous buck converter to generate 1.1V at 25A from a 12V input. The design was originally used in a notebook application which had a 3 cell lithium ion battery for the input. The TPS51117 has a light load efficiency mode to keep the no load losses low in portable applications.

TI's Standard Terms and Conditions for Evaluation Modules apply.
