

1 Startup

The startup waveform with input voltage=5V is shown in Figure 1. A load of 4A was applied at the output.

Figure 1

The startup waveform with input voltage=11.5V is shown in Figure 2. A load of 4A was applied at the output.

Figure 2

Channel C2:
input voltage

input voltage
5V/div

Channel C1:
output voltage
1V/div

Time Base:
500 μ s/div

3 Efficiency

The efficiency is shown in Figure 7.

Figure 7

4 Load Regulation

The output power with different input voltages is shown in Figure 8

Figure 8

5 Output ripple voltage

The output ripple voltage at 5V input voltage with a load of 4A is displayed in Figure 9. Output voltage was measured directly at C12. The waveform was taken with AC-coupled and with full bandwidth.

Channel C2:
voltage at
switch node
2V/div

Channel C1:
output voltage
(C12)
50mV/div

Time Base:
2μs/div

Figure 9

The output ripple voltage at 11.5V input voltage with a load of 4A is displayed in Figure 10. The waveform was taken with AC-coupled and with 20MHz bandwidth.

Channel C2:
voltage at
switch node
5V/div

Channel C1:
output voltage
(C12)
50mV/div

Time Base:
2μs/div

Figure 10

The output ripple voltage at 18V input voltage with a load of 4A is displayed in Figure 11. The waveform was taken with AC-coupled and with 20MHz bandwidth.

Figure 11

6 Frequency response

Figure 12 shows the loop response with 4A load.

Figure 12

VIN	5V	11.5V	18V
fco	29.7kHz	23.84kHz	28.05kHz
Phasemargin	66.5°	83.9°	75.9°
gainmargin	-11.9dB	-8.9dB	-8.1dB

Table 1

7 Miscellaneous waveforms

The voltage on the switch node is shown in Figure 13 @ 4A Iout and 5V input voltage (with 20MHz bandwidth) (fsw ~ 180kHz D ~ 80%)

Figure 13

Channel C1:
voltage at switch
node
2V/div

Time Base:
1μs/div

The voltage on the switch node is shown in Figure 14 @ 4A Iout and 11.5V input voltage (with 20MHz bandwidth) (D ~ 35%)

Figure 14

Channel C1:
voltage at switch
node
2V/div

Time Base:
500ns/div

The voltage on the switch node is shown in Figure 15 @ 4A Iout and 18V input voltage (with 20MHz bandwidth) (D ~ 23%)

Channel C1:
voltage at switch
node
2V/div

Time Base:
500ns/div

Figure 15

Figure 20 shows the waveform at switchnode with full bandwidth (18V at the input) Time base was set to 20ns/div

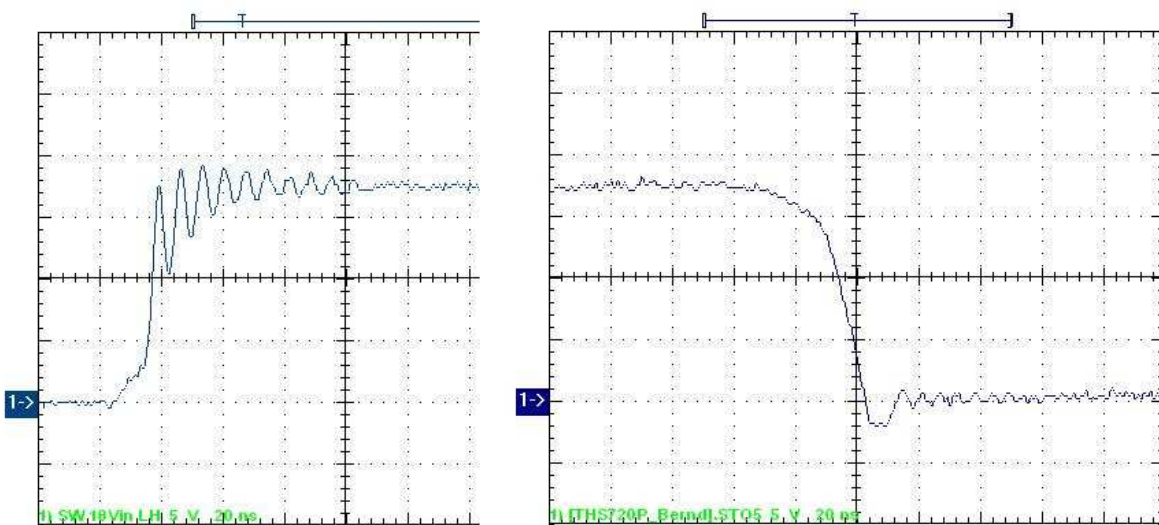

Figure 16

8 Load Transient

The waveforms were taken with a transient from 2A to 4A (100Hz) I.

Figure 21 shows the waveform with 5V input. (Vout measured with 20MHz bandwidth)

9 Infrared Image

After some minutes with 4A output current the following IR-Image Figure 23 was obtained.

Figure 23

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
