PMP10822.3 Ten Output QR Flyback and Buck Converter Reference Design Top of Board

Description

The PMP10822 reference design utilizes two QR flyback, and four buck converters. The efficiency for the 12V and 24V flyback approaches 87%, while the 16V buck converter has efficiency greater than 89%.

Features

- The 12V and 24V flyback converter's efficiency approaches 87% at full load, with an input of 120VAC
- The 16V buck converter's efficiency is greater than 89% at full load, with a 24V input
- Board length is approximately 3.45" x 4.95"
- Test report is available

Fully assembled board (shown above) developed for testing and performance validation only, not available for sale.

TI's Standard Terms and Conditions for Evaluation Modules apply.
