NCP3063BSTEMGEVB: ROHS Boost Demonstration External MOSFET Evaluation Board

The NCP3063 supports a boost configuration with a wide input voltage range from 3.0 V to 40.0 V input. The NCP3063 is a low cost converter that supports a peak current of 1.5A with a maximum duty cycle of 85.7 %. The NCP3063 can also be used as a controller for peak currents greater than 1.5A when an external device is used. The use of an external device also allows operating frequencies beyond 150 kHz to minimize component size.

Features and Applications

Features

- Wide range input: 3.0 to 40.0 Vdc
- Simple design with a small number of external components
- Programmable switching frequency
- CyclebyCycle current limiting

Evaluation/Development Tool Information

Product	Status	Compliance	Short Description	Parts Used	Action
NCP3063BSTEMGEVB	Active	Pb-free	ROHS Boost Demonstration External MOSFET Evaluation Board	NCP3063BDR2G	Contact Local Sales Office Inventory
